Camarillo, California, 93010, United States

Four years of experience troubleshooting and setting up computer systems and equipment in live production environments. Proven track record of quickly solving various technical issues in mission-critical environments and bringing in new technologies to elevate production workflows.

Work Experience

Production Technology Lead

Jun 2021 - Present

[Crossroads Church](#) | Camarillo

- Oversaw and maintained all hardware and software related to live productions on-site.
- Led over \$50, 000 in projects and efforts to improve and maintain production systems.
- Quickly resolved hardware and software failures during live events, keeping production running smoothly and preventing services from halting.
- Led and grew a team of production volunteers, training, coordinating, and supporting team members by onboarding systems and technologies that improved production quality and setup efficiency.
- Provided general IT support for staff members across the facility, running with small projects to improve and update computer systems on-site.

Animation Technology Intern

Jun 2023 - Aug 2023

Skydance Animation Studios | Santa Monica

- Learned the pipeline process for CG movies from start to finish.
- Assisted pipeline engineers by developing a custom script to audit their codebase.
- Worked with systems engineers to integrate a studio-wide printing system and created SOPs for the system.
- Created a tracking document for all editorial hardware, assisting the media engineering team during studio location changes.
- Solved Jira tickets for the IT help desk and set up a fleet of new machines with their MDM software.
